PROFILE

Dynamic and innovative PHP Laravel Developer with three years of experience specializing in scalable backend systems. Proven track record in driving revenue growth, optimizing performance, and building customer trust through cutting-edge solutions. Skilled in crafting robust architectures and committed to delivering excellence in PHP, Laravel Framework, and database management. Passionate about continuous learning and eager to contribute to groundbreaking projects that drive innovation and create positive impact.

EXPERIENCE

PHP/Laravel Developer

Flex Monie | 2024 - Present

- admin backend features for Flex Monie, such as agent account creation, aggregator conversion, and permission management, by integrating APIs.
- Utilized PHP, Laravel, and API integration techniques to develop and integrate functionalities, ensuring collaboration with the team for smooth implementation.

PHP/Laravel Developer

D-Aggregate | 2023 - Present

- Develop and launch of new applications, optimized existing software, and implemented payment integration solutions.
- Achieved a 50% revenue increase and enhanced Google search visibility by 50%, while enhancing customer trust.
- Collaborated on innovative features, continuously updated skills, and ensured seamless execution through proactive problem-solving.

PHP Laravel Developer

Alphageek | 2022 - 2022

- Rescued a non-functional project by implementing a robust inventory management feature, resolving functionality issues, and adding new functionalities.
- Transformed the project into a functional application utilized by the company for merchandizing and tracking products nationwide. Enabled the company to secure projects from major corporations. Handled confidential documents and maintained their proper organization
- Systematically identified and addressed bugs, demonstrated adaptability to overcome challenges, and leveraged technical expertise to develop and integrate essential features.
