PROFILE

Skilled PHP Laravel developer with 3 years of experience building and maintaining scalable backend systems. Streamlined functionalities by 20% at Flex Monie using API integration. Rescued a non-functional project at Alphageek, transforming it into a core business application. Committed to excellence in PHP, Laravel, and database management.

EXPERIENCE

PHP/Laravel Developer

Flex Monie | 2024 - Present

- Optimized application performance: Enhanced application efficiency by 15% through code optimization and implemented robust security protocols.
- Backend development for core functionalities: Developed functionalities for transactions, user accounts, CRUD operations, etc, ensuring data integrity and platform stability.
- Strong collaboration: Collaborated with cross-functional teams to deliver seamless new features, aligning with user needs.
- Successfully spearheaded significant application improvements, contributing to overall platform stability and functionality.

PHP/Laravel Developer

Alphageek | 2023 - 2023

- Rescued non-functional project: Successfully salvaged a non-functional project, identified and resolved critical functionality issues.
- Developed core application: Developed and integrated essential features, transforming it into a core business application used nationwide for FMCG merchandising and tracking.
- Empowered company growth: This achievement secured projects from major corporations, empowering significant company growth.

PHP/Laravel Developer - Intern

D-Aggregate Technologies | 2022 - 2023

- Led development of a web application using PHP Laravel and data visualization tools, empowering users with market insights.
- Significantly improved efficiency and functionality of an existing data analysis platform.
- Built a robust, API-driven backend system for a company blog with user subscription and email notifications.
